The Agricultural Conservation Program

Helps **RURAL**
DEVELOPMENT

U. S. DEPARTMENT OF AGRICULTURE
Agricultural Conservation Program Service

RUNDOWN, MISUSED FARMS WEAKEN THE COMMUNITY • CONSERVATION FARMING STRENGTHENS THE COMMUNITY

Once this land carried a family plus some city folks. It can produce again needs conservation farming practices

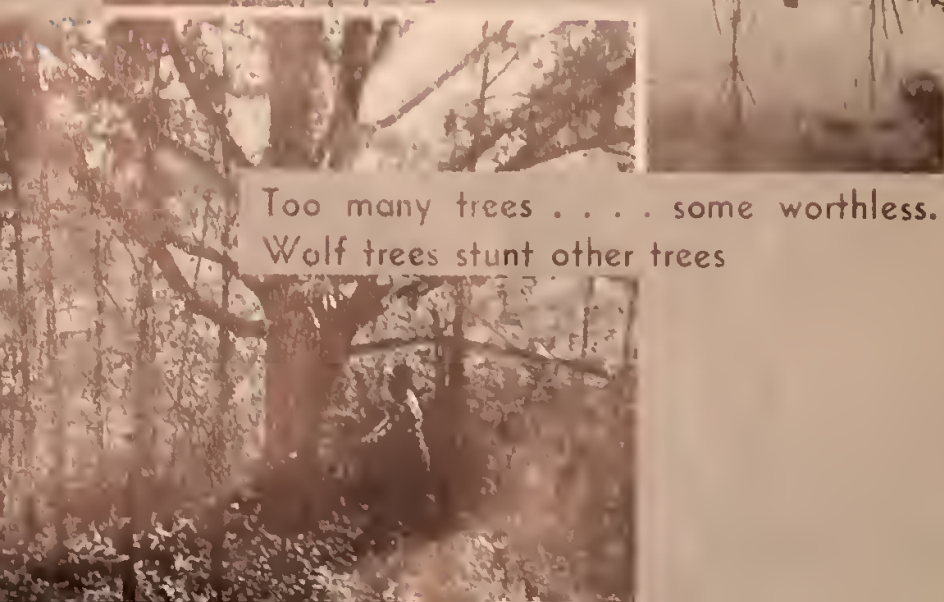

Good conservation improves land and provides feed

Drainage put this land to good use

Too often wet poor crops, even failure

Too many trees some worthless. Wolf trees stunt other trees

Good families, good soil keep America strong

Timber worth something now . . . more later

Conservation farming helps the farm family and the community. The family does most of the work, furnishes equipment, and uses their own know-how. ACP shares the cost. Result better land, better income, better living.

ING STRENGTHENS THE COMMUNITY

Good conservation improves land and provides feed

to good use

Timber worth something now . . . more later
